

A FEW WORDS FROM OUR CUSTOMERS

"We called Always Your Best Choice around 2am in the morning with no heat. We were all freezing. The house got cold and that is what woke me up. Always Your Best arrived 1 hour later and were we ever glad to see our guy come in the door. Needless to say we are all cozy and warm now."

-Gary & Helen P.

"Recently we had our furnace go out! It was so cold and our 1-month-old Granddaughter was staying with us that night and we were concerned about warmth in the house! We ended up calling Always Your Best Choice and within an hour they were at our house! We immediately thought we were going to have to replace our furnace and it was going to cost us a lot! When the technician came in he went through the furnace and found some part that needed to be replaced and not the entire furnace. He had the exact part he needed and within about 1 hour from getting there he had our furnace back up and working!"

We were so impressed with the service and how quickly they had the job completed and needless to say they didn't have us buying a new furnace! We really appreciate what they did for us."

- John & Mary B.

"It was in the dead of winter when our furnace went on the "blink". Our house was so cold and we had to hurry and find a reputable company. I had asked a few neighbors, but unfortunately both of them had used the same company who was out of business. I did some research online and came across Always Your Best Choice so I gave them a call. They explained to me in great detail my options to help me make an educated decision.

We chose one and they installed the next day. We couldn't be more pleased with this company. I highly recommend them."

-Carlton R.

"I needed a whole new Plumbing system for my office. I chose Always Your Best Choice and that's exactly what it was. My neighboring business needed the same thing but went with another company. Well, I'm glad I chose yours because he had a difficult time with his getting it all done on a timely basis."

- Rege R.

ONLY THE BEST FOR PENNSYLVANIA HOMES

Always Your Best Choice recently announced the introduction of a new line of heating and air conditioning equipment designed specifically for Pennsylvania climate with special, introductory pricing.

"Climate varies dramatically across the country and manufacturers tend to build one-size-fits-all products," said Chris Fragale, Always Your Best Choice Plumbing, Heating & Cooling, Inc. "Our conditions are unique enough that we decided to design a system specifically for Pennsylvania and work with manufacturers to produce a product to our specification. When we had the system design we wanted, we chose to put our own name on it – 'Pittsburgh's Best Plumbing Heating and Air'"

The outside air conditioner is only part of the system Always Your Best Choice offers, explained Chris. Heating and air conditioning systems are comprised of a number of components that are field engineered to work together optimally for comfort and energy savings. The components are not always interchangeable. Mismatched components and

an improperly designed system might work — for a while. But it will use more energy and reduce the equipment life.

"When I buy a household appliance," explained Chris, "I can take it home, plug it in, and it works. Heating and air conditioning systems are much more complex. The outside components must be matched precisely to the components located inside the house. The design of the system can also be affected by a number of house specific factors including the house's humidity, how well it's sealed, the orientation of windows, and so on. We've worked with a domestic manufacturer operating in an ISO 9000 factory to produce products that we engineer into a system, specifically designed for Pennsylvania and further refined for each house."

This new line of air conditioners and furnaces are available exclusively through Always Your Best Choice. For more information on the special introductory pricing, or for a complementary engineering analysis of your home or business, contact Always Your Best Choice Plumbing, Heating & Cooling.

THREE KEYS TO COMFORT

1. THE RIGHT COMFORT SYSTEM

At Always Your Best Choice we strive to find the best heating and cooling system for each client. We understand that your needs are as individual as your family. A member of our team will work with you to find the perfect comfort system for your lifestyle and your budget.

3. COMPANY GUARANTEE

At Always Your Best Choice, we guarantee your 100% satisfaction. We are fully bonded and are committed to a drug-free workplace.

2. INSTALLATION

Our installation team is professional and courteous and promises a quality installation of your comfort system that only uses first-quality materials. As an insured contractor, we follow all installation codes and obtain any permits that might be necessary for your installation. After the installation is complete we perform a certified startup and take time to fully familiarize you with your new comfort system.

MAKE-A-WISH®

Pittsburgh's Best Plumbing is proud to partner with the Make-A-Wish foundation. Ask us about our efforts!

HEATING SOLUTIONS

Pittsburgh's Best Plumbing Heating and Air furnaces are built with the latest technology and designed to provide optimal comfort and cost savings.

A QUIETER SYSTEM

Pittsburgh's Best Plumbing Heating and Air variable-speed furnaces are equipped with an electronically commutated motor (ECM). The ECM creates a gradual fan blower speed change, which means a quieter and more efficient heating system.

CONSTANT TEMPERATURES

Both our Premium and Deluxe Furnaces use two-stage heating performance technology. The unit operates on the low stage 85% of the time, only switching to full capacity on extremely cold days. Conventional furnaces running at 100% capacity cycle on and off and can create temperature differences of up to 6 degrees from your comfort setting. This also creates temperature pockets in your home that trap air. A two-stage ECM motor creates better circulation and makes your home more comfortable.

A Pittsburgh's Best Plumbing Heating and Air **PREMIUM FURNACE** gives you the optimal performance in forced air heating. Variable speed motors and two-stage operation provide the ultimate in comfort, quiet operation, and low energy bills. These are our best units, and they come with our limited 10-year parts and labor warranty.

Backed with a 10-year parts and labor warranty, our **DELUXE FURNACE** operates with two-stage technology and a standard blower motor.

A low cost but still high quality alternative, Pittsburgh's Best Plumbing Heating and Air **STANDARD FURNACE** includes an energy efficient blower motor and 2 stage heating. These units come with a 10-year parts warranty and 1 year-labor warranty.

A low cost alternative, our **BASIC FURNACE** provides comfort and is backed by the basic equipment parts warranty and a 1-year labor warranty.

COOLING SYSTEMS

Pittsburgh's Best Plumbing Heating and Air provides an array of cooling system solutions to meet each family's individual needs.

Our **PREMIUM COOLING** air conditioners and heat pumps have a low operating cost and provide the ultimate quiet comfort. These units come with our limited 10-year parts and labor warranty with an available lifetime Warranty.

A **DELUXE COOLING** unit will provide the same super quiet operation with a high-efficiency rating that will save you money on your electric bill for years to come. A 10-year parts and labor warranty is included.

With our **STANDARD COOLING** unit you'll receive a quality unit that will provide the comfort you count on. These units come with our limited 10-year parts and 1-year labor warranty.

The **BASIC COOLING** air conditioner or heat pump gives you a value price and includes a 10-year parts warranty and 1-year labor warranty.

WHAT MAKES UP YOUR COMFORT SYSTEM?

INDOOR UNIT

The indoor part of your ducted comfort system is either a furnace or air handler. This unit contains the blower, which circulates air throughout your home. A furnace may use gas or propane. An indoor coil can be added to provide comfort year round. An air handler contains a blower, coil and electric heat strips. The indoor unit is matched with an outdoor unit to bring comfort to your home.

OUTDOOR UNITS

Outside your comfort system will have either an air conditioner or heat pump. An air conditioner will cool and dehumidify your home. A heat pump works the same way but can also provide heat in the colder months.

DUCTWORK LEAKAGE TESTING

Leaking ducts can reduce heating and cooling system efficiency by as much as 20%. Duct sealing or replacement increases efficiency, lowers your energy bills, and can often pay for itself in energy savings. A duct test is performed to ensure your energy savings and comfort.

OTHER SOLUTIONS

If you have a non-traditional heating or cooling need then Always Your Best Choice will help you find the perfect solution whether it is a Ductless Split System, High Velocity System or Whole House De-humidifier.

INDOOR AIR QUALITY

With an average of 70 percent of your time spent inside your home, why put up with less than healthy indoor air? Talk to our team member about how an Indoor Air Quality system can control contaminants, humidity, and allergens in your home. Your family will thank you.
