International Health Care

Cosmetic Medical Partners is very active in international markets, having developed highly profitable hair transplant centers as well as LASIK and eye care centers in multiple overseas markets.

One of our projects achieved an eight times return on investment (ROI) in two years.

We have developed centers in Puerto Rico, Dubai, India, Hong Kong, the Philippines, Spain and the U.K. with future projects in Malaysia, Singapore, Saudi Arabia, Oman, Abu Dhabi, Costa Rica, Panama, Argentina, Mexico, Cyprus, and other markets.

One of our strategic alliances is a US-based travel medicine and vaccine company that is offering franchises to physicians, nurses and entrepreneurs in international markets. This company's franchised centers offer travel vaccinations, immunizations, flu vaccines and related procedures and services to patients. If you are interested in learning more about this exciting franchise opportunity, [email us](#). Franchises are still available in select U.S. markets as well as overseas.

We are also interested in exploring opportunities in the health care services sector in India.

Cosmetic Medical Partners is also exploring opportunities in medical tourism, medical weight loss and age management.

We invite inquiries for joint ventures, strategic alliances and opportunities from companies, centers, practices, physicians, entrepreneurs in the U.S. who wish to expand their business into international markets, particularly where we have prior experience including Puerto Rico, Dubai, Hong Kong, Manila, India, the U.K., and others.

For further information, [email us](#).
