

SECURE MONITORING

SAFEGUARD YOUR FAMILY, YOUR HOME, AND YOUR PEACE OF MIND.

Kozi Media Design is proud to be your audio visual solutions partner.

Kozi Media Design creates security control and monitoring systems that give you peace of mind by allowing you to monitor strategically located surveillance cameras and motion detectors around your property. These systems can report any door or window left ajar or arm/disarm an entire security system at once or zone by zone all with a single command — and you don't even have to be at home at the time.

Security systems may include:

- Indoor and outdoor surveillance cameras
- Recording to web-based DVR for access from anywhere in the world via an Internet-connected computer (PC or Mac®), Apple® iPhone®, or BlackBerry® smartphones
- Systems that can alert you to movement in a specific area during predetermined times according to parameters you define
- Systems that can e-mail you text, a photo, or even a short video of someone outside your house while you're away — whether it's a deliveryman or an intruder
