

Visitor Management

Photo ID * Visitor Management * Corporate Food Service * Single/Secure Log On * Proximity Cards * Construction Site Manager

Do You Know Who Is In Your Building And What They Are Doing There?

In today's unsure world, add the security and comfort of knowing who is on the property with a visitor management solution.

Visitor Point - Check-in and check-out is easy! Visitors present an approved credential such as a driver's license. The credential is scanned & the system auto fills the fields to quickly produce a plastic ID card or badge (in conjunction with a photo ID system). A simple swipe of the visitor badge automatically logs the

visitor in or out. Customize your visitor database information and produce in-depth reporting on activities, visitor traffic. System provides real-time tracking of visitors for effective security auditing.

Visitor Manager also available.

SmartReg – Populate any enrollment system or registration form with a simple swipe of a government ID. The operator simply opens the specific application or service, scans the card, and SmartReg does the rest. Eliminate keystroke errors and increase customer service. Software supports almost any enrollment or registration application (including older legacy applications).

People Track™ Visitor Management System

People Track is a cost effective software solution designed to register and track visitor activity. Visitors can be pre-enrolled or scanned at registration or entry. When an incident occurs, could you look back to determine exactly who entered your building, and why.

- capture visitor information and check people in
- instantly create a visitor badge with photo
- classify each visitor
- run a background check (with optional links to outside resources)
- run a complete visit history report for later use
